RE: Recommendation of Kirby Totty

Mr. Totty assisted me in June of 2002 to evaluate and partially recondition a PA-28-235 that was purchased in Livermore, California and flown to Nashville, Tennessee for the work. I can honestly say that Kirby is the type of personality that you want around your aircraft. Not only does he have a professional approach and a tremendous depth of knowledge of the industry, he is a perfectionist. He wants it done properly with no corners skipped and nothing left to chance. If you are considering Kirby Totty for the purchase of an aircraft or the maintenance of an existing one, I would look no further.
